

At the Westhill Central School District Transportation Department, we do more than drive students to and from school—we help launch their future.

Every day, we transport future politicians to their first debates, scientists to their first conferences, and athletes to career-defining games.

You might even have a future President or astronaut on board.

Because at Westhill, every trip is an opportunity to inspire the next generation. Our team is committed to ensuring each student arrives safely, confidently, and ready to learn.

If you're looking for a meaningful career change, join our team and start driving toward a brighter future.
